

Torah Refrigerator Magnet

Materials (per child) for teacher's preparation:

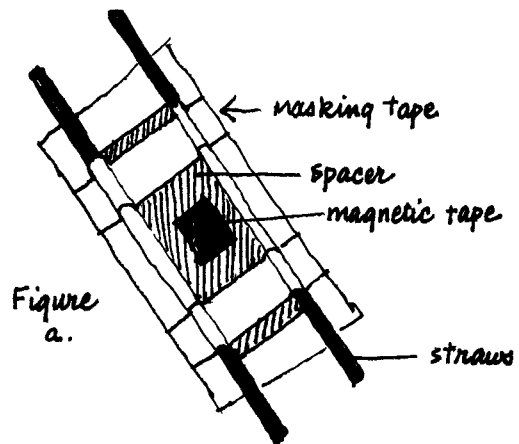

1. 2" x 4" piece of white cardboard or railroad board
2. 2 coffee stirrer straws (5" each)
3. 1" x 3" piece of corrugated cardboard
4. 1/2" x 1/2" piece of magnetic tape
5. Masking tape

Teacher's preparation:

1. Position corrugated cardboard on the center back of white cardboard. This will act as a "spacer" for the Torah handles.
2. For Torah handles, lay the straws along either side of the spacer with equal amounts sticking out over the top and bottom edges.
3. Tape the handles to the spacer and the back surface of the cardboard, leaving the very center of the spacer free of tape.
4. Adhere the piece of magnetic tape to the center of the spacer. (Figure a)

Materials for each student:

1. Sticky tape scraps
2. Color felt tip markers
3. 2" x 1-1/4" piece of silver metallic paper
4. Black, permanent felt tip marker
5. Glue
6. Two 2" x 2" pieces of aluminum foil
7. Very small pieces of double stick tape

Construction:

1. Glue silver metallic paper to center front of the cardboard to act as a breastplate. The breastplate must be decorated with the permanent marker.
2. Decorate the rest of the Torah front with sticky tape shapes.
3. Draw details on and around the sticky tape shapes with the color markers.
4. Wrap small pieces of double stick tape around tops of Torah handles.
5. Make *Rimonim* by scrunching foil pieces around the sticky handles and pressing them into similar shapes.
